Welcome to the private beta for our API!

To get started, please create an account with this email address
(heyhmin@ewhain.net).

Create Account

Join the community Slack (you should receive a separate invite shortly) to discuss the API, share outputs with other users, and receive announcements and product updates.

Once you've built a product or application, if you would like to serve API outputs to more than five people (e.g. the general public, a team in your company, or beta testing with external users), you will need to submit a production review request and have your application approved. To get approved, please follow our Going Live Guide. We currently serve millions of API calls per day, and are ready to serve production traffic.

Resources for getting started:

- Developer Quickstart
- Prompt 101 Guide
- API Community Guidelines

Above all, please don't hesitate to reach out to support@openai.com with any feedback or questions, or just to let us know how things are going. We're excited to see what you build!
